Southwest Florida Water Management District
Daily Crop Protection
Water Use Permit Report Form

Permittee:_____ **Permit #**_____

Crop Protection Date: _____ **Submitter's Name:** _____

Reporting cold or heat stress water use for crop protection is required as a condition of your water use permit. This information can be reported online at: **www.watermatters.org,** or please complete this form for each day that water was pumped for crop protection. Then submit all of the daily crop protection forms with that month's meter readings report. Reporting crop protection ensures that the quantities pumped for crop protection are not counted against compliance with your permitted quantities.

Please enter either your beginning and ending meter readings or the starting and ending time you pumped for crop protection. Use a separate form for each day that the withdrawal point(s) were used for crop protection. If additional space or forms are needed, this form may be photocopied or is available on the District's website (**www.watermatters.org/permits/wup/** under "Reporting forms").

District ID Number	Start Time or Begin Meter Reading	End Time or End Meter Reading	Estimated Gallons Pumped
