Minutes Administrator

Barbara Matrone, Senior Administrative Coordinator

The Southwest Florida Water Management District (District) hosted a tour of Plant City's One Water Demonstration Facility. There was a total of 23 in attendance: eight Public Supply Advisory Committee members, seven District staff, two Governing Board members, and six guests. This two-hour tour of the plant's operation center demonstrated that appropriate advanced treatment technology can further purify the City's reclaimed water to a potable standard that can supplement the local drinking water supply.
