He stated GDP growth during the 2nd quarter was slightly higher than 1st quarter, although the second quarter of 1.4% was almost half of expectations.

   Mr. Grady stated job growth has slowed considerably since the June jobs report of 271 thousand jobs created with just 156 thousand jobs created in September. The Quits/Layoff ratio maintained the positive trend through May. Almost twice as many workers quit, presumably for better job opportunities in most cases, than were laid off.

   Mr. Grady stated inflation remained below the Fed Target of 2% in June, maintaining a steady rate over the last several months between 1.39% and 1.69%. The median housing price reached record levels in June 2016. He stated the affordability index suggests that housing is becoming more expensive than the 2012-2013 timeframe. Mortgages continue to perform well with significantly lower rates of delinquency and foreclosure than experienced during the housing crisis.

   Mr. Grady stated unemployment increased slightly to 5.0% in September. Less educated unemployment is much higher at 8.5%, while college educated unemployment is much lower at 2.5%.

   Mr. Grady presented the quarterly investment report for the period ended September 30, 2016.
