Quantifiable Objectives

Weeki Wachee River Surface Water Improvement and Management (SWIM) Plan

A Comprehensive Conservation and Management Plan

March 2017

Water Quality	Target
Water clarity – river average	>50 feet ¹
Water clarity – near the headspring	>120 feet ¹
Nitrate concentration in the river	<0.20 mg/L ²
Water Quantity	
Minimum flow for the river system	>90% natural flow ³
Natural Systems	
Coverage of desirable submerged aquatic vegetation in the river	>40% ⁴
Coverage of invasive aquatic vegetation (including filamentous algae) in the river	<10% ⁴

¹ Based on data presented in Figure 15

² Dodson and Bridger 2014 – Nutrient TMDLs for Weeki Wachee Spring and Weeki Wachee River (WBIDs 1382B and 1382F)

³ SWFWMD 2008 – Weeki Wachee River Recommended Minimum Flows and Levels

⁴ Based on data presented in Figure 21

ACTIVE SURFACE WATER QUALITY MONITORING STATIONS WEEKI WACHEE RIVER

Ammonia (N) (Total)
Calcium (Dissolved)
Carbon-Total Organic (Total)
Chlorophyll a (Total)
Color (Dissolved)
Depth (Total)
Depth, bottom (Total)
Dissolved Oxygen (Total)
Iron (Dissolved)
Magnesium (Dissolved)
Nitrate-Nitrite (N) (Total)
Nitrite (N) (Total)

Nitrogen- Total (Total)
Orthophosphate (P) (Dissolved)
pH (Total)
Phaeophytin (Total)
Phosphorus- Total (Total)
Potassium (Dissolved)
Residues- Nonfilterable (TSS) (Total)
Residues- Volatile (Total)
Salinity (Total)
Secchi-horizontal (Total)
Sodium (Dissolved)
Specific Conductance (Total)
Temperature (Total)
Turbidity (Total)

Legend

 P106 Surface Water Quality Monitoring

Southwest Florida
Water Management District

- (1) Period of Record for Stations WW0 - WW5: 2006-Present
- (2) Period of Record for Stations WEEKI 1-4 and WEEKI 6-8: 1989-Present
- (3) Home nr Shell Island, Home nr Mud River, Home Spgs at Home Spgs grab samples associated with continuous monitoring stations: Period of Record for these stations: 2017-Present

Surface water grab samples are collected at 0.5 meters below the surface and irrespective of tide. Samples are analyzed at the SWFWMD Laboratory in Brooksville, FL. Field measurements are taken in concert with grab samples using field deployable sondes.

Water Quality Quantifiable Objectives

- **Water Clarity**
 - River Average >50 feet
 - Near Headsprings >120 feet
- **Nitrate Concentration in the River**
 - TMDL <0.20mg/L

Horizontal Secchi Disk (ft)

Weeki Wachee

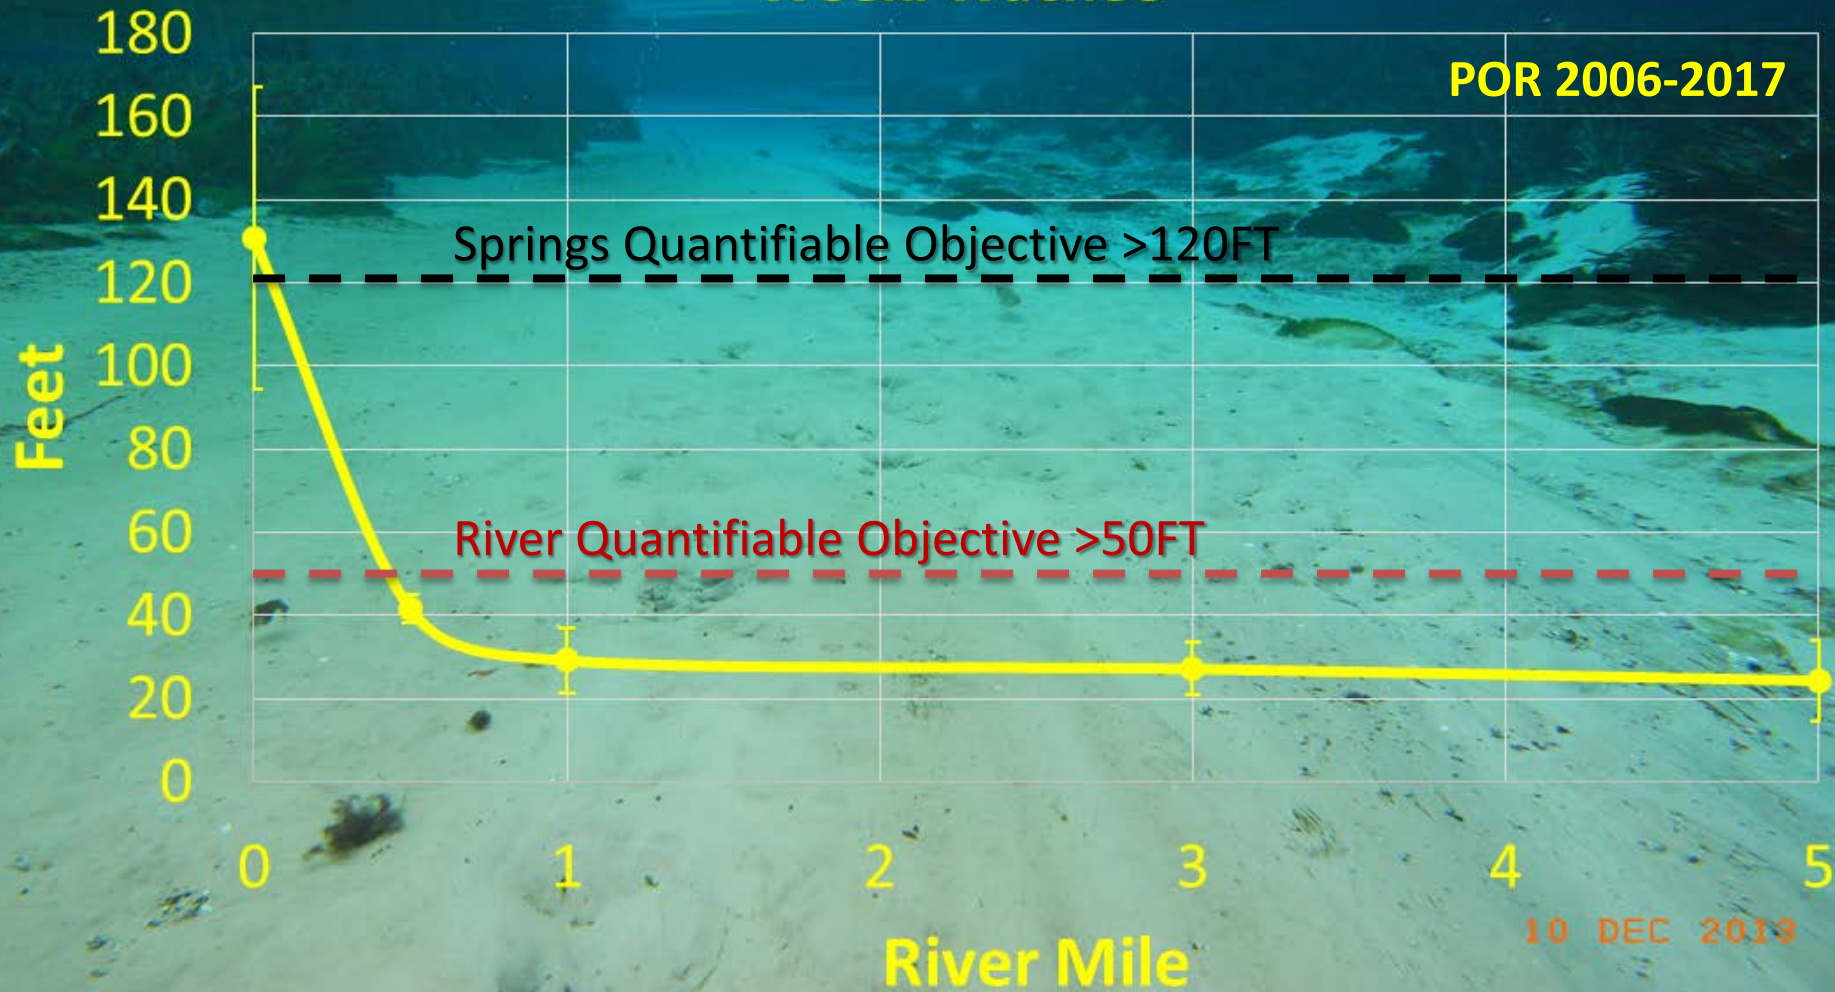

Figure 15: Water Clarity in the Weeki Wachee River

Water clarity, as measured by a horizontal secchi disk, over time at the five fixed river stations. Clarity is affected by many factors including the amount of tannins and suspended sediment in the water column.

Water Quality Quantifiable Objective - Clarity

Average Annual Water Clarity Weeki Wachee Springs

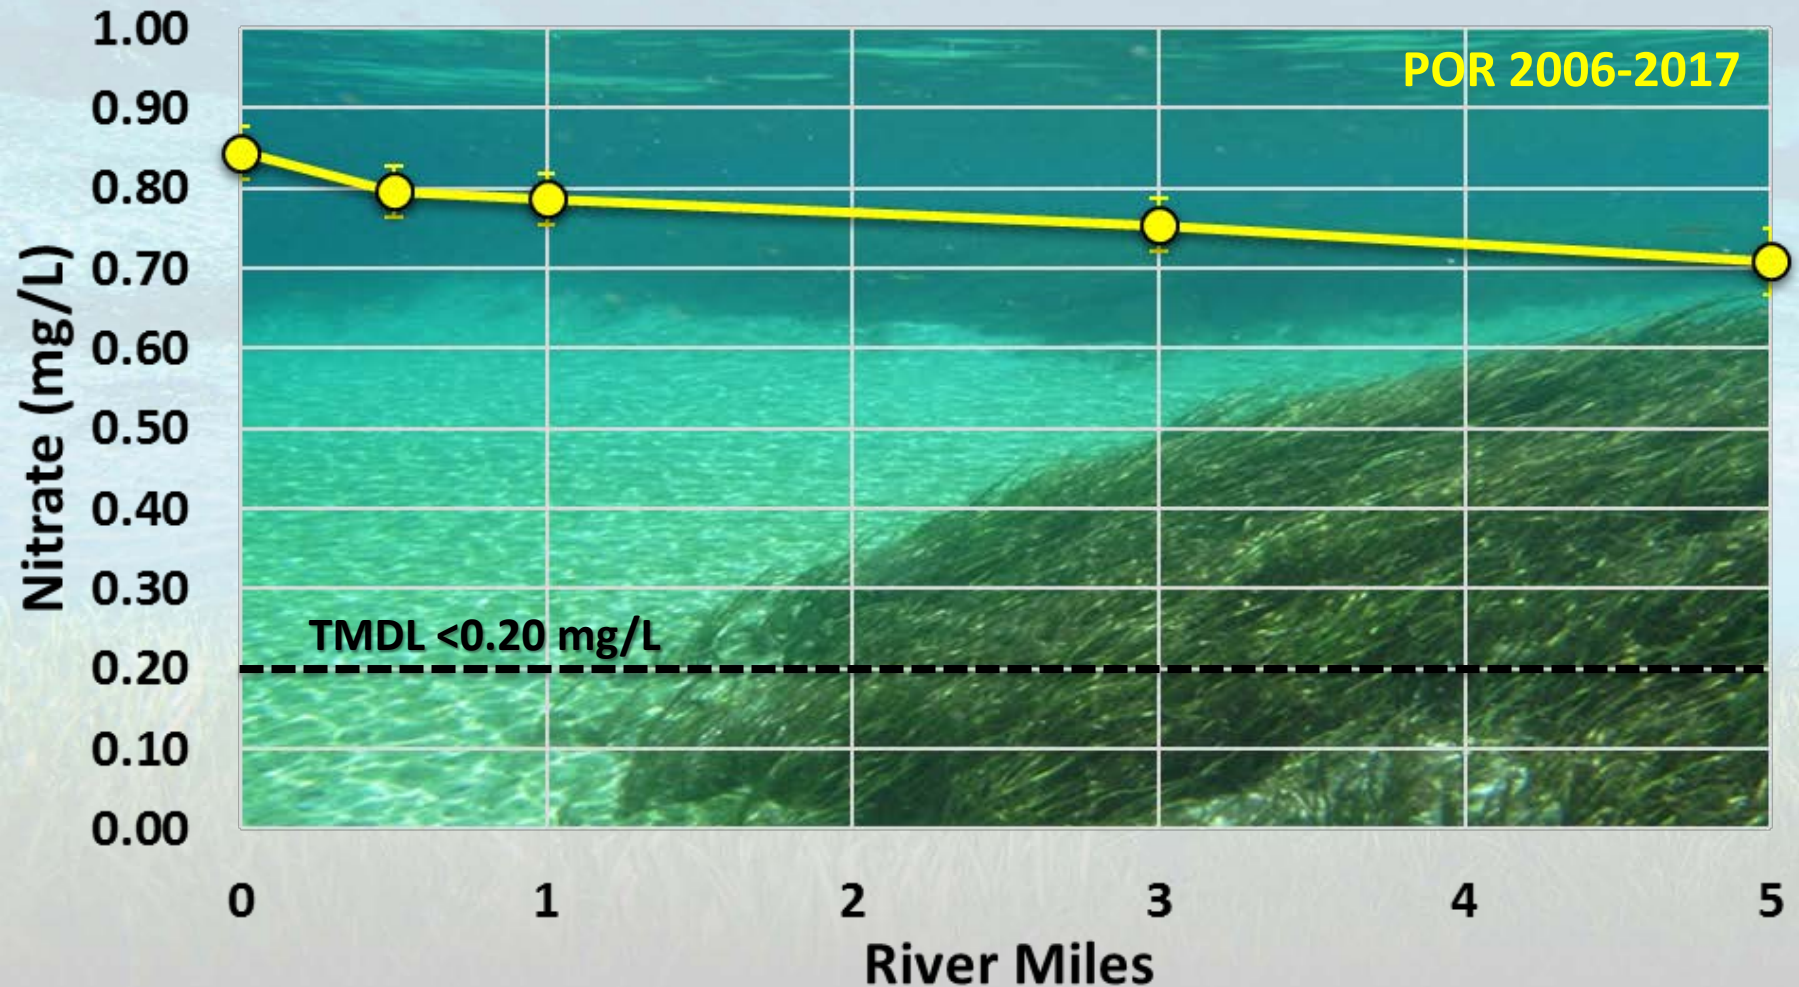

Water Quality Quantifiable Objective - Clarity

Average Annual Water Clarity Weeki Wachee River Average

Water Quality Quantifiable Objective - Nitrate

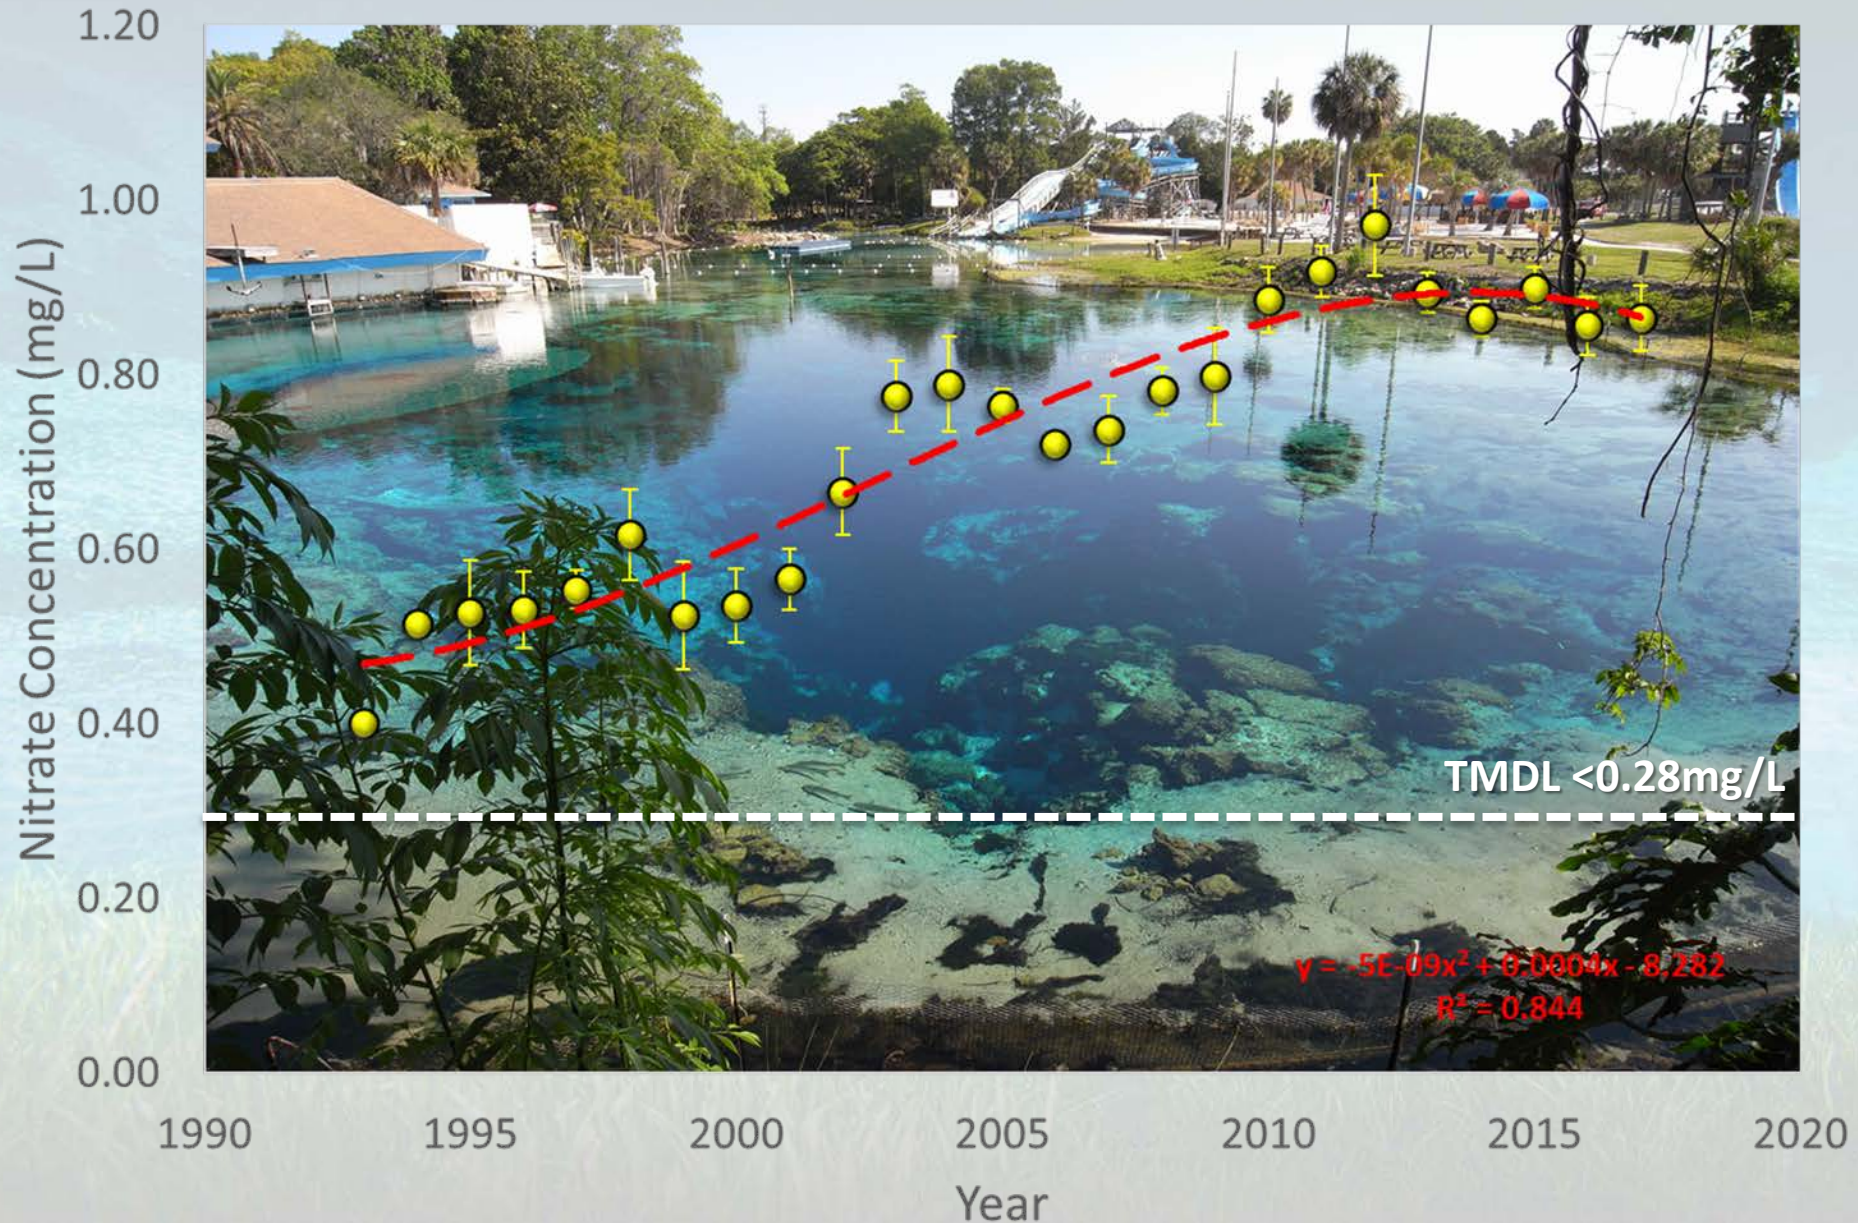

Nitrate Concentration Weeki Wachee River

Nitrate Concentration Weeki Wachee River

Nitrate Concentration Weeki Wachee Springs

Water Quantity Quantifiable Objective

- Minimum Flow for the River
> 90% of Natural Flow
- **Maintaining 95.1% of
Natural Flow**

Natural Systems Quantifiable Objectives

- 
- Coverage of Desirable SAV
> 40% Coverage

- 
- Coverage of Undesirable SAV
<10% Coverage
