2 ABOUT

Data used to prepare these tables and figures are Analysis Days.

These descriptive plots and statistics include:

- Timeseries plot of the data with color coded reference to defined minimum flows implementation “periods”.
- Histograms of data distribution with normal density curve overlay.
- Tables of distributional statistics by minimum flows implementation period, river segment, and taxon.
- Boxplots of distribution by minimum flows implementation period and river segment.

Data are presented grouped by biological response variable: abundance, density, diversity, or richness.

3 METHODS

3.1 GENERAL

Morris Bridge sink data were excluded. Taxa were synonymized. Non Analysis Days were excluded.

3.2 ABUNDANCE

Abundance was determined by calculating the sum of the n variable (number of individuals observed for a given species on a given date at a given site). An overall abundance, a taxon abundance, and abundances grouped by MFL period and river segment were calculated.

3.3 DENSITY

Density was determined by calculating the sum of the result_m3 variable (density of individuals observed for a given species on a given date at a given site). For these analyses, qualitative observations were not included. An overall density, a taxon density, and densities grouped by MFL period and river segment were calculated.

3.4 DIVERSITY

Diversity was determined using the R vegan package function diversity(), specifying for Shannon-Wiener and base exp(1). An overall diversity, a site diversity, and diversity grouped by MFL period and river segment were calculated.

3.5 RICHNESS

Richness was determined using the R vegan package function specnumber(). Species never observed were removed. An overall richness and richness grouped by MFL period and river segment were calculated.

Data Set	Upper	Middle	Lower	Downstream
Zooplankton	10	160	160	584
Benthos	60	74	56	388
Nekton	92	103	185	998

Data Set	MFL Period	Upper	Middle	Lower	Total
Benthos	Period 1	7	8	8	23
Benthos	Period 2	18	27	22	67
Benthos	Period 3	7	11	11	29
Benthos	Period 5	28	28	15	71

4.3.2.3 Site level diversity over time by MFL period and river segment

4.4 RICHNESS

4.4.1 TABLES

4.4.1.1 The total number of taxa (richness) of organisms found in the entire data set.

x
328

4.4.1.2 Richness across MFL periods by river segment.

River Segment	Period 1	Period 2	Period 3	Period 4	Period 5	Segment Richness
Upper	NA	NA	NA	NA	39	39
Middle	79	93	78	38	53	144
Lower	78	100	101	53	55	161
Downstream	168	194	194	137	NA	280

4.4.1.3 Richness across river segments by MFL period.

MFL Period	Upper	Middle	Lower	Downstream	Period Richness
Period 1	NA	79	78	168	193
Period 2	NA	93	100	194	223
Period 3	NA	78	101	194	220
Period 4	NA	38	53	137	149
Period 5	39	53	55	NA	85

4.4.2 FIGURES

4.4.2.1 Histogram of species richness

4.4.2.2 Average richness over time, grouped by year of samplin, by MFL period and river segment.

4.4.2.3 Boxplots of richness, grouped by year, by MFL period and river segment.

4.4.2.4 Boxplot of site level richness by MFL period and river segment.

4.4.2.5 Site level richness over time

4.4.2.6 Site level richness over time by MFL period and river segment

4.4.2.7 Taxa richness by MFL period and river segment

5 BENTHIC MACROINVERTEBRATES

5.1 ABUNDANCE

5.1.1 TABLES

5.1.1.1 Total abundance of the data set.

Total Abundance
173112

5.1.1.2 Total abundance of each taxon, and MFL period:River segment abundance, sorted by most abundant.

Final Taxa	Total Abun	Period 1 Upper	Period 1 Middle	Period 1 Lower	Period 1 Downstream	Period 2 Upper	Period 2 Middle	Period 2 Lower	Period 2 Downstream	Period 3 Upper	Period 3 Middle	Period 3 Lower	Period 3 Downstream	Period 5 Upper	Period 5 Middle	Period 5 Lower

5.1.1.3 Total Abundance over river segments by MFL period.

River Segment	Period 1	Period 2	Period 3	Period 5	total
Upper	1127	7594	4110	4336	17167
Middle	630	7525	2595	3498	14248
Lower	412	4971	3060	2710	11153
Downstream	23067	66844	40633	NA	130544

5.1.1.4 Total Abundance of MFL period by River segment.

MFL Period	Lower	Middle	Upper	Downstream	total
Period 1	412	630	1127	23067	25236
Period 2	4971	7525	7594	66844	86934
Period 3	3060	2595	4110	40633	50398
Period 5	2710	3498	4336	NA	10544

5.1.2 FIGURES

5.1.2.1 Histogram of species abundance.

5.1.2.2 A graph of total abundance over time, grouped by year of sampling.

5.1.2.3 Boxplots of individuals, grouped by year, by MFL period and river segment.

5.1.2.4 Abundance by year, MFL period, and river segment.

5.1.2.5 Total abundance by river segment, MFL period, and date.

5.1.2.6 Total abundance by MFL period and river segment.

5.2 DENSITY

5.2.1 TABLES

5.2.1.1 Total average density of the data set.

Total Avg Density
618

5.2.1.2 Total average density of each taxon.

Final Taxa	Total Avg Density
Kirkegaardia sp.	3831.6

5.3.2.1 Boxplot of site level shannon diversity by MFL period and river segment

5.3.2.2 site level shannon diversity over time

5.3.2.3 Site level shannon diversity over time by MFL period and river segment

5.4 RICHNESS

5.4.1 TABLES

5.4.1.1 The total number of taxa (richness) of organisms found in the entire data set.

x
516

5.4.1.2 Richness across MFL periods by river segment.

River Segment	Period 1	Period 2	Period 3	Period 5	Segment Richness
Upper	31	97	81	90	184
Middle	16	74	55	55	125
Lower	21	70	36	55	114
Downstream	241	306	173	NA	398

5.4.1.3 Richness across river segments by MFL period.

MFL Period	Upper	Middle	Lower	Downstream	Period Richness
Period 1	31	16	21	241	253
Period 2	97	74	70	306	365
Period 3	81	55	36	173	233
Period 5	90	55	55	NA	125

5.4.2 FIGURES

5.4.2.1 Histogram of species richness

5.4.2.2 Average richness over time, grouped by year of samplin, by MFL period and river segment.

5.4.2.3 Boxplots of richness, grouped by year, by MFL period and river segment.

5.4.2.4 Boxplot of site level richness by MFL period and river segment.

5.4.2.5 site level richness over time

5.4.2.6 Site level richness over time by MFL period and river segment

5.4.2.7 Taxa richness by MFL period and river segment

6.2.2 FIGURES

6.2.2.1 Histogram of species density

6.2.2.2 Average density over time, grouped by year of sampling.

6.2.2.3 Boxplots of individual densities, grouped by year, by MFL period and river segment.

6.2.2.4 Density of individuals by MFL period and river segment.

6.2.2.5 Density of individuals by river segment and MFL period.

6.2.2.6 Density by MFL period and river segment.

6.3.2.1 Boxplot of site level diversity by MFL period and river segment

6.3.2.2 Site level diversity over time

6.3.2.3 Site level diversity over time by MFL period and river segment

6.4 RICHNESS

6.4.1 TABLES

6.4.1.1 Total number of taxa (richness) of organisms found in the entire data set.

x
143

6.4.1.2 Richness across MFL periods by river segment.

River Segment	Period 1	Period 2	Period 3	Period 4	Period 5	Segment Richness
Upper	25	44	25	15	25	58
Middle	31	44	37	13	32	66
Lower	38	46	46	28	34	68
Downstream	72	94	98	56	NA	116

6.4.1.3 Richness across river segments by MFL period.

MFL Period	Upper	Middle	Lower	Downstream	Period Richness
Period 1	25	31	38	72	82
Period 2	44	44	46	94	110
Period 3	25	37	46	98	110
Period 4	15	13	28	56	68
Period 5	25	32	34	NA	50

6.4.2 FIGURES

6.4.2.1 Histogram of species richness

6.4.2.2 Average richness over time, grouped by year of samplin, by MFL period and river segment.

6.4.2.3 Boxplots of richness, grouped by year, by MFL period and river segment.

6.4.2.4 Boxplot of site level richness by MFL period and river segment.

6.4.2.5 site level richness over time

6.4.2.6 Site level richness over time by MFL period and river segment

6.4.2.7 Taxa richness by MFL period and river segment
