Water Use Permit

A Water Use Permit (WUP) allows withdrawal of a specified amount of water, either from the ground or from a lake or river.

A Water Use Permit (WUP) authorizes the consumptive use of particular quantities of ground or surface water. The Florida Statutes (Chapters 120 and 373) and Florida Administrative Code (Chapters 40D-1 and 40D-2) prescribe rules for applying for a water use permit. The applicant submits the application form, all required supplemental information forms, and all required documentation so that the District Water Use Permit Bureau evaluation staff can determine if the use of water is reasonable and beneficial, does not interfere with any presently existing legal use of water, and is consistent with the public interest. It is the responsibility of the applicant to provide reasonable assurances for this on both an individual and cumulative basis. Information pertaining to the District's water use permitting process is described in Chapters 40D-1 and 40D-2 of the Florida Administrative Code and the District's Water Use Permit Applicant's Handbook.

Water Use Permit Types

WUPs are based primarily on the amount of water needed.

- Individuals:**
 - Permits for 500,000 gallons per day (gpd) or more
 - Permits for 100,000 gpd or more, but less than 500,000 gpd
 - Permits for less than 100,000 gpd
- General Permit by Rule**

A General WUP by Rule is authorized for withdrawals of water that do not meet or exceed any permitting threshold unless expressly exempted by law or District rule. An application is not required for a General WUP Permit by Rule.
