

Lake Panasoffkee Bi-Weekly Conditions Report May 15, 2014

Independent Gate (19 ft. in length)

The Southwest Florida Water Management District (District) monitors environmental conditions at a number of water bodies in its 16-county area, including Lake Panasoffkee and the Withlacoochee River, to determine the health of our local waters and the results of restoration projects. The District also manages a number of local structures, including the Wysong-Coogler Water Conservation Structure as a means of water conservation. This update provides current information about the health of Lake Panasoffkee and the operation of the Wysong-Coogler Water Conservation Structure.

Lake Panasoffkee Water Level: 40.02 Feet Above Mean Sea Level (MSL).					
☐ Below Seasonal Average Less than 38 Ft Above MSL		Seasonal Average 38–39.5 Ft Above MSL		⊠ Above Seasonal Average More than 39.5 Ft Above MSL	
Lake Panasoffkee Dissolved Oxygen: <u>data not available.</u> This number, represented in milligrams per liter, indicates the amount of oxygen present in the water. This affects the lakes ability to support life.					
Below Average Less than 5 mg/l		☐Average 5-10 mg/l		Above Average More than 10 mg/l	
Lake Panasoffkee Water Clarity 28.00 % of sunlight reaching the lake's bottom.					
		☐Average 5-20% of light			
Below Average Less than 5% of light				⊠ Above Average More than 20% light	
	5–20% mperature: <u>81.32</u> °	of light			
Less than 5% of light Lake Panasoffkee Water Ter	5–20% mperature: <u>81.32</u> °	of light
