Bids may be withdrawn at any time prior to the bid opening.

The District reserves the right to reject any and all bids, or alternative bid proposals, if applicable, or waive any minor irregularity or technicality in bids received. A bid which is incomplete, unbalanced, conditional, obscure or which contain additions not required, or irregularities of any kind, or which do not comply in every aspect with the RFB, may be rejected at the option of the District. If a subcontractor does not meet the requirements of this RFB as determined by the District, the District may either reject the bid or request the apparent successful bidder to provide a substitute subcontractor, without an increase in bid price that meets the requirements of this RFB. If the apparent successful bidder declines to make any such requested substitution, the contract will not be awarded to such bidder. All subcontractors of bidder shall perform as independent contractors of bidder and not as employees, representatives, or agents of the District.

Lobbying Prohibition is not applicable to this solicitation.

2.17 **INDEMNIFICATION.**

The Contractor agrees to indemnify and hold harmless the District, its agents, employees and officers, from and against all liabilities, claims, damages, expenses or actions, either at law or in equity, including attorneys' fees and costs and attorneys' fees and costs on appeal, to the extent caused by the negligence, recklessness, or intentional wrongful misconduct of the Contractor, its agents, employees, subcontractors, assigns, heirs or anyone for whose acts or omissions any of these persons or entities may be liable during the Contractor's performance under the Agreement. This provision shall survive the expiration or termination of the Agreement.

2.18 **INSURANCE.**

The contract resulting from this RFB will require the Contractor to maintain during the entire term of the contract, insurance in the kinds and amounts or limits with a company or companies authorized to do business in the State of Florida as listed in the Sample Agreement attachment, Insurance Requirements. The Contractor will not commence work under the contract until the District has

received an acceptable certificate or certificates of insurance showing evidence of such coverage. Certificates of insurance must reference the District Agreement Number and Project Manager.

2.19 **BONDING.**

2.19.1 **BID BOND.** Bidders will furnish a forfeiture bid bond, cashier's check, or certified check with its bid response in the amount equal to 5% of their Total Bid Amount, including any contingency listed on the bid form, as a guarantee that the bidder will enter into a contract with the District if awarded and furnish the required Performance, Payment and Guaranty Bond. A sample forfeiture type bid bond is attached to this RFB.

2.19.1.1 Electronic submittals require a copy of the bid security (forfeiture bid bond, cashier's check, or certified check) to accompany the submission. The original bid security will be delivered within three business days after the bid opening or postmarked on or before the bid opening date.

2.19.1.2 After the bids have been compared, the District may, at its discretion, return the bid bonds accompanying such bids as in its judgment would not likely be considered in making the contract award. All other bid bonds will be held until the contract and performance bond have been executed.

2.19.2 **PERFORMANCE, PAYMENT, AND GUARANTY BOND.**

Within ten days from notice that Contractor has been awarded the Agreement and prior to the commencement of any project work, a Performance, Payment, and Guaranty Bond that conforms with section 255.05, Florida Statutes, will be required of the Contractor. Sample is attached to this RFB.

2.19.2.1 The Performance, Payment, and Guaranty Bond must be for an amount not less than the total agreement amount including contingency. The contingency dollar amount will be determined after the District issues the Notice of Intent to Award if not listed on the bid response form. The bond must remain in full force and effect through the District's contract guarantee period. The cost of this bond must be included in the total bid amount on the Bid Response Form.

2.19.2.2 The Performance, Payment, and Guaranty Bond must be written through a surety company licensed to do business in the State of Florida that holds a Certificate of Authority as an acceptable surety on federal bonds (Department of Treasury's Listing of Approved Sureties, Department Circular 570).

2.19.2.3 In lieu of providing a Performance, Payment and Guaranty Bond, at the discretion of the District, the successful bidder may substitute either cash, (payable to the District's cashier), a certified or bank cashier's check from a national or state bank made payable to the District, or an irrevocable letter of credit in the required amount.

2.19.2.4 If the amount of the Agreement increases after award of the Project, the District agrees to pay the Contractor for any bond premium increase it incurs at the rate of incursion if such premium is reasonable, as determined by the District in its sole discretion. The District's payment obligation under this section is contingent upon the Contractor providing documentation evidencing said premium increase.

2.19.3 **POWER OF ATTORNEY.** The Bid Bond and the Performance, Payment, and Guaranty Bond signed by an Attorney-in-Fact must be accompanied by a certified copy of such person's Power of Attorney to sign.

2.20 **ARCHAEOLOGICAL, HISTORICAL AND CULTURAL SITES.**

If archaeological artifacts are uncovered during construction, the Contractor must stop work in the area and promptly notify the District so that a course of action can be determined.

2.21 **TRENCH SAFETY ACT.**

The Contractor must comply with the Trench Safety Act, section 553.60 through 553.64, Florida Statutes. The Contractor must complete and submit the Trench Safety Act Compliance Form attachment, as part of the Contractor's bid package.

2.22 **VALUE ENGINEERING.**

Value engineering is not applicable to this solicitation.

2.23 **DRAWINGS AND SPECIFICATIONS.**

The Contractor will be furnished drawings and technical specifications. The drawings which constitute a part of the bid documents are as indexed on the title sheet of the drawings. The drawings for this Project are provided in the Reference Documents section of this RFB.

2.23.1 The Contractor will keep one set of drawings and specifications on site and will maintain this set on site at all times. As construction progresses, the Contractor will note all deviations from the drawings and specifications on this set. Such deviations will be approved by the District and will include all changes in materials and equipment. The District will periodically check these drawings for completeness and accuracy and at the completion of the work these drawings will be used by the District as a guide in the preparation of permanent Record Drawings.

2.23.2 The District's interpretation of the drawings and/or specifications will be final. Large scale drawings supersede small scale drawings. Dimensions govern in all cases. Scaling of drawings may be done only for general location and general size of items. All dimensions shown of existing work and all dimensions required for work that is to be connected with existing work will be verified by the Contractor by actual measurement of the existing work. Any work or variance with that specified or shown on the drawings will not be performed by the Contractor until approved in writing by the District. Any work performed by the Contractor without such approval from the District will be at its own risk and expense.

2.23.3 All drawings, specifications and copies thereof furnished by the District are the property of the District and are not to be used on other work; and with the exception of the signed contract set, are to be returned to the District at the request of the District upon the completion of the work.

2.24 **FAILURE TO COMPLETE THE WORK ON TIME.**

The Contractor shall coordinate and work cooperatively with the District's consultants. The Contractor will take into account all contingent work which is to be done by other parties arising from any cause whatsoever and will not plead its want of knowledge of said contingent work as an excuse for delay in its work or for non-performance.

2.24.1 Nothing in this section will be construed as limiting the right of the District to declare the Agreement forfeited, or to take over the work, or to claim damages for the failures of the Contractor to abide by each and every one of the terms contained in the Contract Documents. Completion date will be construed as being the date on which the work is fully accepted by the District.

2.24.2 If the Contractor is delayed at any time, in the progress of the work, by an act of neglect of the District or its employees, agents, or consultants, or by changes ordered by the District, or by strikes, lockouts, fire, unavoidable casualties or any other causes beyond the Contractor's control, then the time of completion will be extended for such reasonable time as the District's Project Manager may decide. This is the Contractor's sole remedy for the aforementioned delays.

2.25 **LIQUIDATED DAMAGES.**

The parties agree that time is of the essence in the work provided for herein and that a precise determination of actual damages which could be incurred by the District for delay in the completion of the work would be difficult to ascertain. Accordingly, the parties agree that the liquidated damages for each and every day that the time consumed in completing the work exceeds the time allowed therefore shall be \$600.00 per calendar day. The parties specifically agree that the stated liquidated damages do not constitute a penalty. The amount of liquidated damages occasioned by the Contractor's delay will be deducted and retained out of the monies payable to the Contractor. If not so deducted, the Contractor and sureties for the Contractor shall be liable thereof. This provision shall survive the expiration or termination of the Agreement.

2.26 **CONTRACTOR'S UNDERSTANDING.**

It is understood and agreed that the Contractor has, by careful examination, satisfied itself as to the nature and location of the work, the character, quality and quantity of the materials to be encountered, the character of the equipment and facilities needed preliminary to and during the prosecution of the work, the general and local conditions, and all other matters which can in any way affect the work under the Agreement. The Contractor acknowledges that it has investigated and correlated his observations with the requirements of this RFB and satisfied itself as to the conditions affecting the work. These conditions include, but are not restricted to, those bearing upon transportation, disposal, handling and storage of materials, availability of labor, water, electric power, roads and uncertainties of weather, river stages, lake stages, tides, or similar physical conditions at the site, and the character of equipment and facilities needed preliminary to and during prosecution of the work. The Contractor further acknowledges that it is satisfied as to the character, quality and quantity of surface and subsurface materials or obstacles to be encountered insofar as this information is reasonably ascertainable from an inspection of the site, including all Drawings and Specifications and all other documents made a part of this RFB. Any failure by the Contractor to acquaint itself with the available information will not relieve the Contractor from its responsibility for estimating properly the difficulty or cost of successfully performing the work. The District assumes no responsibility for any conclusions or interpretations made by the Contractor on the basis of the information made available by the District, its officers or employees prior to the execution of the Agreement, unless such information has been stated expressly in this RFB.

If the Contractor believes that any subsurface or physical condition that is uncovered or revealed either: 1) is of such a nature as to establish that any technical data on which the Contractor is entitled to rely under this RFB is materially inaccurate; or 2) is of such a nature as to require a change in the Contract Documents; or 3) differs materially from that shown or indicated in the Contract Documents; or 4) is of an unusual nature, and differs materially from conditions ordinarily

encountered and generally recognized as inherent in work of the character provided for in the Contract Documents; then Contractor shall, promptly after becoming aware thereof and before further disturbing the subsurface or physical conditions or performing any work in connection therewith, notify the District and Engineer in writing about such condition. The Contractor shall not further disturb such condition or perform any work in connection therewith, except as aforesaid, until receipt of written order to do so.

2.27 MATERIALS, APPLIANCES, AND LABOR.

Unless otherwise stipulated, the Contractor will furnish and pay for all materials, labor, water, tools, equipment, light, power, transportation, and other facilities necessary for the execution and completion of the work.

2.28 TOOLS, PLANTS, AND EQUIPMENT.

If at any time before the commencement or during the progress of the work, tools, plants, or equipment appear to the District to be insufficient, inefficient or inappropriate to secure the quality of work required, or the proper rate of progress, the District may order the Contractor to increase their efficiency, to improve character, to augment its number or substitute new tools, plants, or equipment, as the case may be and the Contractor will conform to such order. The failure of the District to demand such increase of efficiency will not relieve the Contractor of its obligation to secure the quality of work and the rate of progress necessary to complete the work within the time required by the Agreement and to the satisfaction of the District.

2.29 MATERIALS AND EQUIPMENT SCHEDULES.

As soon as practicable after the execution of the Agreement, and before any material or equipment is purchased, the Contractor will submit to the District for approval a complete list of materials and equipment to be incorporated in the work. Any materials listed which are not in accordance with the Agreement requirements will be rejected.

2.30 STANDARDS FOR QUALITY AND WORKMANSHIP.

All materials, equipment, and supplies furnished by the Contractor for permanent incorporation in the work will be new and of quality standards specified. Workmanship will be first class and the finished product equal to the best-accepted standards of the trade for the category of work performed. It is the District's intent to obtain a high-quality job that will operate and function with least maintenance costs.

2.31 GUARANTEE.

All equipment, materials and installation thereof which are furnished by the Contractor will be guaranteed by the Contractor against defective workmanship, mechanical and physical defects, leakage, breakage and other damages and failure under normal operation for a period of one year from the date of final Project acceptance thereof by the District or such longer duration if required in the Technical Specifications, whichever is longer. Each item of equipment or materials and installation proving to be defective within the specified period of the guaranty will be replaced without cost to the District by the Contractor or by the Surety. Said guarantees shall be fully covered by the Performance, Payment, and Guaranty Bond.

2.32 ESTIMATED QUANTITIES.

Unless otherwise specified, the quantities stipulated in the bid for various items are approximate

only and subject to increase or decrease in order to make them conform to the program or work selected and actual construction performed. The Contractor will perform a complete and finished job of the scope designated in the award whether the final quantities are more or less than those estimated. The Contractor will be responsible for verifying all estimated quantities and incorporating any adjustments from the computation into the Total Bid Amounts submitted in response to this RFB.

2.33 PERMITS AND REGULATIONS.

The District has not identified any permits required for this Project. However, the Contractor will be responsible to secure all necessary permits for the Project should any be identified. The Contractor will keep copies of these permits at the construction site throughout the construction period. The Contractor will be responsible for complying with all conditions of the permits.

The District has obtained the following:
U.S. Army Corps of Engineers (USACE) Technical Concurrence of the Design

The Contractor will give all notices and comply with all laws, ordinances, rules and regulations bearing on the conduct of the work as drawn and specified. If the Contractor observes that the Drawings and Specifications are at variance therewith, the Contractor will promptly notify the engineer in writing and any necessary changes will be adjusted as provided in the Agreement for changes in the work. If the Contractor performs work, knowing it to be contrary to such laws, ordinances, rules and regulations and without such notice to the engineer, it will bear all costs arising therefrom.

2.34 PROTECTION OF WORK AND PROPERTY.

The Contractor will at all times protect its work from damage and will protect the District's property against damage, injury or loss arising in connection with the performance of the Project. The Contractor will correct any such damage, injury or loss except such as may be directly due to errors in the Contract Documents or caused by the agents or employees of the District. The Contractor will adequately protect and maintain all passageways, guard fences, lights and other facilities for safety protection required by public authority or local conditions.

2.34.1 At all times, the Contractor will protect all public and privately-owned property, structures, utilities, and work of any kind against damage or interruption of service which may result from the operations of the Contractor. Damage or interruption to service resulting from the Contractor's failure to provide such protection will be promptly repaired or restored at the sole expense of the Contractor.

2.35 CONSTRUCTION ACCESS.

The Project site is on District property. The Contractor's primary access to the Project site is using the District gate along McMullen Booth Road on the western side of the Lake Tarpon Canal in Pinellas County, Florida. A secondary access is available using the District gate on the eastern side of the Lake Tarpon Canal. The secondary access is through the Oldsmar Trail which is used for pedestrian traffic and requires notifying the District and the City of Oldsmar prior to intended use. The Contractor must submit a traffic safety plan to the District for approval within five business days of intended use. The Contractor shall ensure that the existing trail is suitable for the traversing equipment and is responsible for restoring the trail to its original condition from damages caused by the traversing equipment. The Contractor shall provide one padlock for each gate access for the duration of the Project providing the Contractor the ability to unlock the gates.

Parking, laydown, or other Project activities will not be permitted outside the fenced in Project site area on the west side of the Lake Tarpon Canal. Laydown activities outside the fenced in Project site area require approval from the District. The Contractor shall notify the District within five business days of intended laydown use. The Contractor is responsible for securing equipment and materials in the laydown areas.

2.36 **INSPECTION OF WORK.**

The District and its representatives will at all times have access to the work whether it is in preparation or progress and the Contractor will provide proper facilities for access and for inspection. The work will be conducted to the satisfaction of the District and is subject to inspection by its appointed inspectors to ensure compliance with the terms of the Agreement. No inspector is authorized to change any provision in this RFB nor will the presence or absence of an inspector relieve the Contractor from any requirements of the Agreement.

2.36.1 If the Contract Documents, the District's instructions, or laws, ordinances or any public authority require any work to be specially inspected, tested or approved, the Contractor will give the District timely notice of its readiness for inspection; and if the inspection is by another authority, then the Contractor will advise the District of the date of such inspection. Inspections by the District will be promptly made and where practicable, at the source of supply. If any work should be covered up without approval or consent of the District, it will be uncovered for examination at the Contractor's expense.

2.37 **TESTS.**

The District will have the right to require all materials to be submitted to test prior to incorporation into the work by an appropriately certified testing company. In some instances, it may be expedient to make these tests at the source of supply, and for this reason, it is requested that the Contractor furnish the District with information concerning the location of his source before incorporating material into the work. This does not in any way obligate the District to perform tests for acceptance of material and does not relieve the Contractor of his responsibility to furnish satisfactory material. The Contractor will furnish two copies of manufacturer's certificate of compliance with these specifications covering manufactured items incorporated into the work. The Contractor will pay all costs for testing required together with other changes incidental to testing.

2.38 **CONTRACTOR SUPERVISION.**

The Contractor will keep competent supervision on-site during its progress as listed in the Bidder Qualification Requirements attachment. Upon the District's request, the Contractor must provide a list of all proposed Contractor employees fulfilling a supervisory position. Any personnel changes in a supervisory position will require the prior written consent of the District. The superintendent or project manager will represent the Contractor. The superintendent or project manager will give efficient supervision to the work using best skill and attention.

2.39 **HOURS OF WORK.**

The Contractor may access the Project site and perform work between 7:00 a.m. to 7:00 p.m., Monday through Friday provided work hours comply with local ordinances of Pinellas County, Florida. Other hours of work may be authorized at the sole discretion of and in writing by the District Project Manager upon request of the Contractor. The District's working hours will generally be considered as being from 8:00 a.m. to 5:00 p.m., Monday through Friday. Work done at times other than said District working hours will be considered overtime work for the District. As such any inspection services required of the District or its authorized representative during overtime hours

will be made at the expense of the Contractor, and such costs will be deducted from payments otherwise due the Contractor. The cost to be deducted from payment otherwise due the Contractor will be the overtime hours at an hourly rate applicable to the authorized representative.

2.40 **PROGRESS SCHEDULE AND SCHEDULE OF VALUES (POST NOTICE OF AWARD).**

The Contractor shall prepare, submit, and maintain a Progress Schedule for the Project. The Progress Schedule which will be accompanied by a Schedule of Values will be the primary means of control of the Project and will be used as the basis of scheduling all work and for determination of contract progress payments. The Contractor will provide its proposed Progress Schedule and Schedule of Values to the District in accordance with the timeframe provided in the Execution of Contract section. Upon approval, the District will incorporate the Progress Schedule and Schedule of Values into the Agreement.

The Progress Schedule will contain a Gantt chart detailing individual activities of work. The chart schedule will consist of every activity with a duration of five days or more, a value of \$5,000 or more, or any other activity with a critical impact on the job schedule. Shop drawing submittal and review, equipment delivery, and all quality or operational testing activities will be included.

The Schedule of Values, which will be satisfactory in form and substance to the District, will subdivide the work into its component parts in sufficient detail to serve as the basis for measuring quantities in place and calculating amounts for progress payments during construction. An unsupported or unreasonable allocation of the total agreement amount to any one of the activities or work items will be justification for the rejection of the Schedule of Values. The Contractor will not submit an unbalanced Schedule of Values, which provides for overpayment to the Contractor on activities that are to be performed first. The Schedule of Values will be revised and resubmitted until acceptable to the District. The District will not enter into a contract with the Contractor until the Schedule of Values has been approved in writing by the District. Once the Schedule has been accepted by the District, the Contractor will honor prices contained in the Schedule of Values. The total sum of the individual values of the Schedule of Values for each of the activities will equal the total agreement amount.

2.41 **JESSICA LUNSFORD ACT.**

The Jessica Lunsford Act is not applicable to this solicitation.

2.42 **POTENTIAL FERAL HOG DAMAGE.**

Potential Feral Hog Damage is not applicable to this solicitation.

PART III – SCOPE AND SPECIFICATIONS

The District is soliciting bids from qualified bidders to furnish and deliver, if and when ordered, all required work necessary for the construction of a cathodic protection system, concrete repairs, and sealing of structure S-551 as more particularly shown in the Reference Documents.

3.1 **STRUCTURE AND PROJECT BACKGROUND INFORMATION.**

Structure S-551 is a flood control structure located on the outfall canal at the south end of Lake Tarpon. The structure is in Section 16, Township 28 S, Range 16 E, Pinellas County, and was built around 1969 to control the water levels in Lake Tarpon. Due to the structure's proximity to Tampa Bay, the effluent side of the structure (south side) is in direct contact with saltwater and is directly exposed to airborne salts and to tidal fluctuations. While the structure is meeting its designed

intention, the structure suffers from widespread corrosion of reinforcement steel and spalling concrete exasperated by saltwater from Tampa Bay.

3.2 **PROJECT DESCRIPTION.**

This project will repair and seal the concrete, make improvements to reduce the future corrosion by constructing a cathodic protection system, and extend the service life of the structure.

Work over the water on the structure may only be performed during the dry season (defined as typically October 1st through May 31st (8 months)) and is dependent on atmospheric, precipitation, and water level conditions. Work over land or on the structure may be performed at any time of the year but must not impede the District's capability to operate the gates on the structure. The Contractor shall coordinate with the District to perform standard lock out and tag out procedures. All work shall be constructed in accordance with the Reference Documents included with this RFB.

It is essential that the Contractor adhere to the time schedule provided for the Project. The Contractor must be able to provide sufficient equipment and personnel to meet District deadlines.

3.3 **GENERAL REQUIREMENTS AND TECHNICAL SPECIFICATIONS.**

Refer to Reference Documents for General Requirements, Construction Drawings and Technical Specifications more specific to this Project.

Generic Requirements:

- 3.3.1 The Contractor shall provide all necessary labor, equipment, and materials to complete the Project as described within the Contract Documents.

All site and vegetation restoration plans must be approved in writing by the District Project Manager prior to implementation.
- 3.3.4 The Contractor shall have a copy of all permits at the Project work site and shall perform all work in accordance with the requirements of the permits, including those obtained by the District.
- 3.3.5 Prior to commencing work, the Contractor shall provide the District's Project Manager with a copy of its project health and safety plan.
- 3.3.6 The Contractor is responsible for protection of existing trees and vegetation on or adjacent to the Project work site, materials and equipment storage areas, and access roads. All trees are to be in the work site and access corridor are to be protected from damage to the maximum extent practicable.
- 3.3.7 The Contractor is responsible for any cost to dispose of any construction debris or other materials, including discarded material, from the Project site and to dispose of these

materials offsite in compliance with all laws.

3.4 **SCOPE.**

The Contractor shall furnish all labor, equipment, and materials required to perform the work as stated in this RFB, Design Drawings, Technical Specifications, and other construction documents, which includes but is not limited to the following categories/areas:

3.4.1 Turbidity Barrier Installation:

Turbidity barriers will be installed to prevent dispersion of undue material.

3.4.2 Distributed Discrete Galvanic Anode System for Corrosion Protection:

The work under this section consists of supplying, installing, and energizing a zinc-based galvanic corrosion protection system, including required electrical connections, electrical conduit and accessories, monitoring enclosures, reference electrodes, materials, testing, reporting, and ensuring continuity of the reinforcing steel to piers and abutment walls on the outflow side of the structure as outlined in the Construction Drawings.

3.4.3 Bulkhead Cap Reconstruction at Wingwalls 2 and 3:

The work under this section is covered in the Construction Drawings and Technical Specifications.

3.4.4 Fencing and Railing Repair:

The work under this section is covered in the Construction Drawings and Technical Specifications.

The work under this section consists of restoring cracked, segregated, or spalled concrete on S-551 as shown in the Construction Drawings and as directed by the Engineer using pump or pour methods.

3.4.6 Concrete Sealing:

The work under this section is covered in the Construction Drawings and Technical Specifications.

3.4.7 Expansion Joint Rehabilitation:

Replace existing preformed joint material with poured joint with backer rod. The work under this section is covered in the Construction Drawings and Technical Specifications.

3.4.8 Submerged Bulk Anodes Galvanic System for Corrosion Protection:

The work in this section covers the installation of submerged zinc and magnesium anodes at specific locations indicated in the Construction Drawings.

3.4.9 Record Documents:

- 3.4.9.3 Upon completion of the work, the Contractor shall deliver to the District a reproducible set of updated plans. The Contractor will transfer all its "as-built" information to these reproducible and deliver the resultant "as-built" set of plans, together with the record survey book to the District. Each completed set of "As-Built" drawings must include on its face, a certified statement by the Contractor's Principal that the set of "As-Built" drawings accurately depicts the actual work as constructed.

3.5 **DEWATERING.**

The work upstream may be performed when the water levels are low and downstream during periods of low tide. The District does not require dewatering operations for this Project. If the Contractor opts to perform dewatering operations:

- 3.5.1 The Contractor shall design and install temporary coffer dam systems and dewatering systems as necessary to allow the portion of the structure below the water line to be isolated from the upstream or downstream pools. The Contractor is responsible for furnishing, installation, and removal of all dewatering systems.
- 3.5.2 The Contractor shall submit its proposed dewatering design, signed and sealed by a Florida licensed engineer, to the District's Project Manager for review by the District's Engineer. Dewatering activities shall not commence until the District provides written notice that the plan is acceptable. The District's acceptance does not relieve the Contractor of its responsibility to conduct dewatering activities in accordance with industry standards and in such a manner to achieve the performance requirements of this Project.
- 3.5.3 The Contractor shall mitigate excessive noise from dewatering activities. The Contractor's dewatering plan shall detail the Contractor's plan to mitigate excessive noise from dewatering pumps through proper location of pumps and/or providing sound attenuating walls or enclosures for all dewatering pumps as required to meet the noise level reduction requirements as determined in the dewatering plan and by the District's Project Manager. The type, number and anticipated operational aspects (hours of operation, total hours, etc.) of the dewatering pumps shall be included in the Contractor's dewatering plan. All noise levels are also subject to any local ordinances of Pinellas County, Florida.

AGREEMENT
BETWEEN THE
SOUTHWEST FLORIDA WATER MANAGEMENT DISTRICT
AND

FOR
S-551 CATHODIC PROTECTION AND CONCRETE REPAIR
PINELLAS COUNTY, FLORIDA

EXHIBIT "A"

SPECIAL PROJECT TERMS AND CONDITIONS

1. The Contractor, by thorough examination, will satisfy itself as to the nature and location of the work, the conformation of the ground, the character, quality and quantity of the materials to be encountered, the character of the equipment and facilities needed preliminary to and during the prosecution of the work, the general and local conditions, and all other matters which can in any way affect work on the Project.
2. During construction of the Project the Contractor will keep a competent superintendent on the Project site who is authorized to represent the Contractor in the Contractor's absence. The Contractor will maintain an office, off site, staffed by an employee of the Contractor. The District shall be able to reach the Contractor in case of emergency during regular District business hours 8:00 a.m. to 5:00 p.m. District local time, Monday through Friday. Answering services and mechanical telephone answering machines are not an acceptable substitute.
3. Prior to commencing work, the District and Contractor will mutually agree upon the location of parking, material storage, dumpster, restroom, and concrete wash out areas. Upon completion, the Contractor will restore all disturbed areas to their original condition.
4. All persons entering the Project area on behalf of the Contractor will adhere to posted speed limits and traffic patterns.
5. Foul/offensive language will not be permitted; harassment of any type will not be permitted; firearms, other than power actuated devices are not permitted at the Project site. This includes bow and arrow.
6. The Contractor is responsible for all safety aspects of the job and his employees, including all lower tier subcontractors on the job site. The Contractor and all subcontractors must comply with Occupational Safety and Health Administration (OSHA) standards at all times. The Contractor must exercise safe practices at all times for the protection of all persons and property. Walkways and work areas must remain clean and unobstructed at all times.
 - 6.1 The District's Project Manager may, without prior notice, inspect work sites to ensure compliance with the terms and conditions of the Agreement and with safety and health standards and requirements. In the event the Contractor fails to comply with health and safety standards or requirements, the District's Project Manager may issue an order stopping all or any part of the work. Claims by the Contractor for additional compensation related to a stop work order will not be considered or accepted by the District. Any costs, direct or indirect, arising out of or resulting from the stop work order, will be the responsibility of the Contractor.
 - 6.2 The Contractor must: i) immediately report to the District's Project Manager any work-related illness or injury which requires more than first aid treatment, or any loss or damage to District property, ii) develop and post in the construction area a list of emergency phone numbers, iii) prior to commencement of the work, make provisions for prompt medical attention in case of serious injury; and iv) provide a

standard first aid kit in a location readily accessible by all persons.

- 6.3 All construction employees must be suitably dressed for protection against injury. Hard hats are required and must be used in all construction areas during the course of work activity.
7. If the Contractor is delayed at any time, in the progress of the work by an act of neglect of the District, its employees, agents or consultants, or by changes ordered by the District or by strikes, lockouts, fire, unavoidable casualties or any other causes beyond the Contractor's control, then the time of completion will be extended for such reasonable time as the District's Project Manager may decide. This is the Contractor's sole remedy for the delays set forth in this paragraph.
8. If the Contractor should be adjudged bankrupt, or if Contractor should make a general assignment for the benefit of Contractor's creditors or declare insolvency, or if Contractor should persistently or repeatedly refuse or should fail, except in cases in which extension of time is provided, to supply enough properly skilled labor or proper material, or if Contractor should fail to make prompt payment to subcontractors or for material or labor, or disregard laws, ordinances or the instructions of the District's Project Manager, or otherwise be guilty of a substantial violation of any provision of this Agreement, then the District, upon certification by the District's Project Manager that sufficient cause exists to justify such action, may without prejudice to any other right or remedy, and after giving the Contractor seven days written notice, terminate the employment of the Contractor, take possession of the premises and of all materials, tools and appliances thereon and finish the work by whatever method it may deem expedient. In such case, the Contractor will not be entitled to receive any further payment until the work is completed pursuant to the terms and conditions of the Agreement. If the unpaid balance of the contract price exceeds the expense of completing the work, including compensation for additional material and administrative services, such excess will be paid to the Contractor. If such expense exceeds such unpaid balance, the Contractor will pay the difference to the District. The District's Project Manager will certify the damage and expenses incurred by the District as a result of the Contractor's default.
9. If the work should be stopped under an order of any court, or other public authority for a period of three months, through no act or fault of the Contractor or of anyone under the Contractor's control, then the Contractor may, upon giving seven days written notice to the District, stop work and recover from the District payment for all work completed to date in accordance with this Agreement. The District will have the option of suspending or terminating the Agreement.
10. In the case of termination of the Agreement before Project completion, for any cause whatever, the Contractor notified to do so by the District, will promptly remove any part or all of his equipment and supplies from the project site. If the Contractor fails to do so, the District will have the right to remove such equipment and supplies at the expense of the Contractor.
11. The District will have the right to take possession of and use any completed or partially completed portions of the work, notwithstanding the fact that the time for completing the entire work or such portions may not have expired. However, such possession and use will not be deemed an acceptance of any work not completed in accordance with this

Agreement. If such prior use increases the cost or delays the work, the Contractor may be entitled to such extra compensation, or extension of time, or both, as determined by the sole discretion of the District's Project Manager.

12. The Contractor is as fully responsible to the District for the acts and omissions of the subcontractors, and of persons either directly or indirectly employed by the subcontractors, as Contractor is for the acts and omissions, or persons directly employed by Contractor. Nothing contained in this Agreement will be construed to create any contractual relation between any subcontractors and the District.
13. The Contractor and the District will develop a single list of items required to render the services purchased by the District under this Agreement, complete, satisfactory, and acceptable to the District within 30 calendar days after reaching substantial completion according to the following process. The Contractor will contact the District's Project Manager to schedule a joint inspection of the project to occur after reaching substantial completion. The Contractor will provide the District with a proposed list of items to be completed and the completion date for each item, within seven calendar days from the date of inspection. Within seven calendar days of receipt of the proposed list, the District will either approve or revise the list to comply with the terms of this Agreement. If the Contractor disputes any item, the Contractor must provide supporting documentation for the disputed item within seven days of receipt of the revised list. The District will review Contractor's supporting documentation and, in its sole discretion, make a final determination regarding the list of items required to render the services complete as set forth in this paragraph.
 - 13.1 All items that require correction under this Agreement and that are identified after the preparation and delivery of the list remain the obligation of the Contractor. The failure to include any corrective work or pending items not yet completed on the list does not alter the responsibility of the Contractor to complete all the services purchased pursuant to this Agreement.
 - 13.2 If a good faith dispute exists as to whether one or more items identified on the list have been completed pursuant to this Agreement, the District will continue to withhold 150% of the total costs to complete such items.
14. The District's Project Manager will recommend final acceptance of the work performed pursuant to the Project when it is completed and finished in all respects in accordance with the Agreement, including all its attachments. Final inspection will not be made until the Project work is ready for beneficial use or occupancy. The Contractor will notify the District's Project Manager in writing within 15 days prior to the date on which the work will be ready for final inspection. Should it develop that the work installed does not justify such inspection at that time, or that the character of materials or workmanship is such that reinspection is found necessary, the cost of such reinspection including the salary, traveling expense and other expenses of the inspector(s) will be borne by the Contractor and will be deducted from any money due the Contractor.
