

Test Your Soil Before You Fertilize.

Fertilizing101

Southwest Florida
Water Management District

WaterMatters.org/Fertilizing101

Do a soil test before purchasing or applying fertilizer to your lawn to determine what type of fertilizer to buy and how much to apply. Soil testing is the most effective way to determine nutrient and pH levels. Each county in Florida has a UF/IFAS Extension Office that will test soil for residents.

Visit **WaterMatters.org/Fertilizing101** for a list of county Extension Offices within the Southwest Florida Water Management District.
